

# BUCKS in ACTION

"Albert Einstein once said, "Education is not the learning of facts, but the training of the mind to think", and the Honors Chemistry Students at the high school have been working on argument-driven inquiry to embrace this mindset.

The latest activity sought to answer the guiding question: What are the products of chemical reactions? Students worked in groups to create their own lab procedures where they collected data, developed initial argument posters, conducted an argumentation session, and concluded by writing a final lab report, all of which were used to answer the guiding question."

~Mrs. Frost, Honors Chemistry Teacher
