

Bucks in ACTION

Ms. Holloway and Mrs. Hemphill's classes partnered with Mrs. McBeth for a fun activity. Students collaborated together to create a parade route of their own. Using Dash robots and iPads that were borrowed from Berrien RESA, students used coding to program their robot. They used tape to mark their route and used trail and error to code their way to the end of the route. At the end, they were able to demonstrate their robot's movements to their classmates.
